Flexible solutions for your sound requirements

Our team distinguishes us from any other sound company. We have a steadfast commitment to providing you with the best possible package for your needs and to creating a lasting relationship that extends long after your system is installed.

Getting you heard

We are aware that scheduled completion dates are extremely important, and we will work to do whatever it takes to achieve the desired result, on time and on budget.

Schools

We have years of experience listening to the unique problems schools face. We pride ourselves on how we work with schools to create custom solutions.

We train you to use your new equipment. Our team of qualified installation professionals are available to meet with you on site to discuss and evaluate your sound requirements.

Churches

As places of worship exist in many different sizes and layouts, we always take the time to listen to what your requirements are and assess any issues you may be experiencing with your current system.

We strive for aesthetically pleasing sound solutions customised for your church. We have a huge range of products to suit the various designs and needs of churches including speakers, microphones, lecterns, hearing loops and Wi-Fi broadcast systems.

“Friendly and helpful nature”

Father Terry Bergin,
Our Lady of the Way Parish

“Very professional and very reliable”
Sue Jones, Keysborough Bowls Club

Sports

Sandman Sound has helped many local sports clubs upgrade and maintain their radio microphones and outdoor systems.

Every sound system for sporting environments has unique challenges. This includes multiple users, durability, long distances and ambient noise. No two clubs have the same sound requirements, let us tailor the ideal sound system for you.

Come and see our great range of innovative products on display at Sandman Sound in Melbourne. All priced to suit the budget you have in mind.

Industrial

We understand that you require a value for money solution that ticks all the boxes. We commonly complete works outside of normal trading hours so that you can continue business as usual.

You'll get practical sound equipment solutions at Sandman Sound. Ranging from basic systems for smaller factory spaces, to larger sound systems for your indoor and outdoor sound requirements. We can tailor systems for coolrooms, freezer rooms, warehouses and all unique areas.

“We can’t fault them”
James Fetterplace, Kascor Shopfitters

Design

Offering an extensive range of equipment and audio services, we create an individualised sound solution for the unique needs of your business.

We design, supply and install sound systems to meet your budget and to suit your site. Custom products can be manufactured on demand, so if a solution is not readily available Sandman Sound can create the perfect one for you.

Whether you're in need of speakers, wireless microphones, paging consoles, bell timers or sirens, Sandman Sound has you covered.
